**DO IT YOURSELF
BUILD A BIRD SWING**

HOW TO

DO IT YOURSELF. BUILD A BIRD SWING

With a homemade bird swing, you can bring variety and an extra round of exercise into your pet's everyday life!

Our instructions show you how to do it step by step!

TOOLS

- ♥ Saw
- ♥ Drill
- ♥ Pad

MATERIAL

- ♥ **10 Natural cork**
Dimensions: 12 cm
- ♥ **Thick wire**
Dimensions: 50 cm

THE INSTRUCTION

A DIY bird swing in just a few steps.
Have fun making it yourself!
Start by marking out and cutting your corks.

Step 1 - Step 3

STEP 1

Halving the corks

Almost there! Now that all the parts have been put together, we close the swing.

STEP 2

Drill through cork

Now drill a hole through each cork.
Drill through the middle from the top. If you don't have a drill, you can use a chestnut drill like we did.

STEP 3

Stringing corks

Now you can pull the wire through the holes in the corks. Like a chain, pull all the corks onto the wire.

THE INSTRUCTION

Almost there! Now that all the parts have been put together, we close the swing.

Step 4

STEP 4

Join and knot the wire

Almost there! Finally, bring the two end pieces of the wire together at the top. Make sure that a nice circle is formed.

Now you wrap the wire together and then either make a loop, as shown here, or you wrap the wire around a suitable object to secure it.

Carefully choose a good place for the swing that your darling likes to fly to and where he feels comfortable. A strut from the bird farmer or a branch in the aviary might be suitable here. Happy rocking!

... and
done!
